

## **LOSS CONTROL CONSULTANT**

### **Central & Western Iowa**

Midwest Builders' Casualty Group

#### Job Summary

A current job opening exists for a Loss Control Consultant due to the continued growth of our organization. This loss control position is serving the construction and manufacturing industries. This is your chance to play a key role within a professional safety team and with a company that is strongly committed to preventing injuries and saving lives.

The loss control consultant will work from their home primarily servicing Central & Western Iowa. This position offers a competitive salary, bonuses, working remotely from your home office, a company car allowance, and a comprehensive benefits package.

#### Primary responsibilities are:

- Conduct Risk Control Surveys on construction jobsites or manufacturing facilities in order to identify and correct existing and potential safety hazards
- Conduct safety & health training
- Develop safety and risk management programs
- Conduct incident investigations
- Evaluate potential clientele facilities and jobsites to determine if they meet Midwest Builders' Casualty's Group risk management and safety requirements

#### Desired Skills and Experience:

- Preferred Bachelor's Degree in Safety, Hygiene, or Engineering
- Excellent oral and written communication skills
- Ability to conduct safety presentations to large and small audiences
- Proficiency with operating programs: Word and PowerPoint
- 1-2 years of professional safety experience, minimum
- Knowledge of the Construction and the Manufacturing Industries
- Knowledge of the OSHA/MSHA/DOT Standards

- Ability to work independently to accomplish initiatives
- Good time management and organizational skills
- Clean driving record
- Overnight travel (approximately 25%)

### **Midwest Builders' Casualty Group**

A specialized regional workers' compensation carrier serving the construction, manufacturing, and related industries.

Founded in 1983, Midwest Builders' Casualty began as a specialty market focused on writing workers' compensation insurance for the commercial construction industry. Since that time, we have expanded our business to now include manufacturing, equipment, and material sales/service, in addition to other industries that have similar risk characteristics; and that understand the importance of safety and risk management. Our business has been built on providing specialized service and consistent competitive pricing which has helped us to renew, on average, 98% of our policyholders annually. Our policyholders and agency partners understand that workers' compensation insurance is a long-term partnership and is not a decision that should be made solely on price. As a specialty market, Midwest Builders' Casualty delivers the resources and expertise policyholders should expect from their workers' compensation carrier.

Midwest Builders' Casualty distinguishes its business from other markets by providing:

- Each policyholder with a designated claim adjuster and loss control representative
- Onsite safety services for all policyholders based on premiums and exposures
- A user-friendly web-based safety system designed and maintained specifically for the loss control staff
- Practical onsite safety awareness training
- A variety of online safety services
- A variety of payment options, including monthly self-reporting
- FREE 24/7 Nurse Hotline
- Multiple deductible options ranging from small to mid-sized deductibles
- After-hours emergency claims and loss control assistance
- Transitional Work Placement Program

- Post Offer Employment Testing (POET) program
- Oral Fluid Drug and Alcohol Testing program
- Online training resources
